PROFESSIONAL SUMMARY

Junior software developer building applied-AI tools, automations, API integrations, and full-stack applications. Since March 2026, I have worked on independent and client projects using Node.js, TypeScript, Python, React, and PostgreSQL. I am seeking my first formal software-development role.

TECHNICAL SKILLS

- Engineering: Node.js, TypeScript, JavaScript, Python, REST APIs, webhooks, automated tests, Git
- Applied AI: LLM APIs, tool-integrated agents, prompt engineering, workflow automation
- Web and data: React, Vite, PostgreSQL, Supabase, SQL and messaging integrations
- Study/familiarity: RAG, embeddings, Docker and cloud fundamentals

SELECTED PROJECTS

Lead Intelligence OS | TypeScript/Node.js core, Express server and React dashboard - Private components for B2B research, validation, scoring, deduplication, organization, and messaging. Python is limited to auxiliary/historical utilities.

Hunter Jobs | Node.js and TypeScript - Typed opportunity workflow with collectors, normalization, scoring, deduplication, persistence, dashboard, and human review. Public repository is a sanitized edition with synthetic data.

BetsCount | Node.js, Express and Supabase/PostgreSQL - Private AI and messaging tool with per-user context and persistence. Northflank hosting and a five-operator test are historical evidence, not current availability or production scale.

PowerFit | Delivered pilot: application and Supabase/PostgreSQL data-modeling/integration work for a trainer. Public demo: React, JavaScript/JSX and Vite using localStorage; its database layer is not fully connected.

EXPERIENCE

Applied AI, Automation & Full-Stack Developer | Independent and client projects | Mar 2026 - Present - Built web applications, internal tools, integrations, and bots; delivered a private Node.js/discord.js Discord server and bot for a client.

EDUCATION & LANGUAGES

High School Diploma - General Education | Centro Educa Mais Raimundo Araujo | Feb 2023 - Dec 2025

Portuguese: Native | English: Intermediate technical reading; spoken communication in development
